SECURITY RECOMMENDATIONS

1. IMMEDIATE: Block all attacker IPs at firewall level

2. URGENT: Reset all user passwords, especially privileged accounts

3. URGENT: Review and secure access control lists

4. HIGH: Implement rate limiting on SSH authentication

5. HIGH: Deploy intrusion detection system (IDS)

6. HIGH: Enable comprehensive logging and monitoring

7. MEDIUM: Conduct security awareness training

8. MEDIUM: Implement multi-factor authentication (MFA)

9. MEDIUM: Regular security audits and penetration testing

10. LOW: Update security policies and incident response procedures
